Financial Accountability & Corporate Transparency

Bi-Partisan Tax and Transparency Policies and the Panama Papers

Featuring:

Senator Sheldon Whitehouse

Former Representative Claudine Schneider

Faith leaders, small business owners and public interest advocates from more than 30 states will be on Capitol Hill to urge lawmakers to support tax and transparency legislation that benefits small businesses, taxpayers and vulnerable communities. The event focuses specifically on legislation to make it harder to set up “anonymous shell companies” in the US and to prevent offshore tax-haven abuse. These issues are front and center after the massive “Panama Papers” leak revealed international structures enabling crime and corruption.
